INTRODUCTION

Dear business partners,

In our company, the most important attribute of recent years has been emphasis on customer satisfaction. We want to surprise and deliver the best solutions that would meet all customers' needs, therefore the acquisition of the 4M Systems was a logical step. Their products have expanded our military weapons' range with tactical equipment for the army, police, customs and excise, prison service, border guards, and others. Extensive field experience and collaboration with the end users has led to the manufacture of top quality products appreciated by customers all around the world

Lubomír Kovářik
CEO
Chairman of the Board
Česká zbrojovka a.s.

Dear business partners,

At 4M Systems, we strive to offer our customers, former colleagues and comrades-in-arms top quality equipment for their on duty protection and support. Because we ourselves are well aware what impact inadequate equipment can have during combat deployment or training, we try to find solutions that will not complicate things but rather simplify them. Each policeman, soldier or other user will see that our effort is reflected in every one of our products. You can fully rely on all CZ 4M vests, helmets, backpacks or pouches in any situation.

Jan Žižka
CEO
4M Systems a.s.

CZ 4M vests are always developed for a specific purpose and use, so you can choose the best type of a vest for a particular unit or operation. The vests have been designed with an emphasis on maximum comfort and maximum protection. Prior to their launch on the market, they are extensively tested by both the manufacturer and the end users from the ranks of the armed forces.

You can rely on CZ 4M vests in any situation and in any environment.

CZ 4M SPIRIT Open

Product Code: BV-019

CZ 4M SPIRIT Open BALLISTIC T-SHIRT

The CZ 4M SPIRIT Open ballistic T-shirt is a product from our range of ballistic protection equipment in the most advanced ergonomic design for concealed wear. The design of the t-shirt offers maximum concealment required during secret operations or for personal protection. The careful choice of materials ensures a stable microclimate between the user's body and the t-shirt, it can therefore be used for long periods of time in any temperature conditions. The OPEN version has a zipper on the side providing a stable position of the t-shirt on the user's body. It can be unzipped fully to allow for easy dressing and undressing.

The ballistic insert is placed in the inner pockets and its vertical stability is ensured by a patented solution whereby the front and rear inserts are "suspended" on additional shoulder straps made of thin knitted fabric. In addition, they are also placed in a protective cover and secured against sliding.

The t-shirt is made of MOIRA Diagon fibre. The wrong side of this knitted fabric is made of polypropylene yarn weaved diagonally to create a fine ridged finish. When in contact with the body, the rows of the knitted stitches get stretched and the resulting channels aid the circulation of air, wicking capillary moisture away from the skin. The right side of the fabric is made of special polyamide microfiber which together with the elastomer creates a compact elastic surface that is resistant to mechanical effects and provides a good wind stopper effect.

CZ 4M SPIRIT Flexi

Product Code : BV-023

CZ 4M SPIRIT Flexi BALLISTIC T-SHIRT

The CZ 4M SPIRIT Flexi ballistic t-shirt is a product from our range of ballistic protection equipment in the most advanced ergonomic design for concealed wear. The design of the t-shirt offers maximum concealment required during secret operations or for personal protection. The careful choice of materials ensures a stable microclimate between the user's body and the t-shirt, it can therefore be used for long periods in any temperature conditions. The FLEXI version has extremely flexible side panels and a tightening strap. The flexible side panels allow for easy dressing and undressing, the tightening strap can be fastened at the back or at the front as required, allowing the t-shirt to be fitted snugly to the body.

The ballistic insert is placed in the inner pockets and its vertical stability is ensured by a patented solution whereby the front and rear plates are "suspended" on additional shoulder straps made of thin knitted fabric. In addition, it is also placed in a protective cover and secured against sliding.

The t-shirt is made of MOIRA Diagon fibre. The wrong side of this knitted fabric is made of polypropylene yarn weaved diagonally to create a fine ridged finish. When in contact with the body, the rows of the knitted stitches get stretched and the resulting channels aid the circulation of air, wicking capillary moisture away from the skin. CZ 4M SPIRIT Comfort

Product Code: BV-026

CZ 4M SPIRIT Comfort BALLISTIC T-SHIRT

The CZ 4M SPIRIT Comfort ballistic t-shirt is a product from our range of ballistic protection equipment in the most advanced ergonomic design for concealed wear. The design of the t-shirt offers maximum concealment required during secret operations or for personal protection. The COMFORT has been specially designed for prolonged use even in adverse climatic conditions or during highly demanding physical activity.

The ballistic inserts are placed in the outer pockets of the inner t-shirt made of MOIRA Diagon fibres. The wrong side of this knitted fabric is made of polypropylene yarn weaved diagonally to create a fine ridged finish. When in contact with the body, the rows of the knitted stitches get stretched and the resulting channels aid the circulation of air, wicking capillary moisture away from the skin. The right side of the fabric is made of special polyamide microfiber which together with the elastomer creates a compact elastic surface that is resistant to mechanical effects and provides a good wind stopper effect.

This unique material utilizes even a very small space between the user's body and the ballistic insert, maintaining moisture and thereby providing a pleasant microclimate for 12 or more hours. Combined with the additional MOIRA Ultralight t-shirt, it is very comfortable to wear in any conditions.

The COMFORT t-shirt is pulled over the head and tightened on the body with a rear elastic strap. This ensures a good position on the body maximizing the concealability with any outer layer of clothing (polo shirts, shirts, suits, etc.). The ballistic insert is placed in the outer pockets and its vertical stability is ensured by a patented solution whereby both the front and the rear inserts are "suspended" on additional shoulder straps made of thin knitted fabric. In addition, they are also placed in a protective cover and secured against sliding.

CZ 4M VIP

Product Code: BV-005

CZ 4M VIP

COVERT BALLISTIC VEST

Covert ballistic protection for concealed wear.

The CZ 4M VIP vest has been designed for everyday wear by patrol units, investigative police teams and for personal protection. The outer material of the vest with reduced flammability diminishes adhesion of the outer garment and is noiseless.

The special velcro fasteners are gentle on clothing. The elastic parts of the vest are made of neoprene which is UV resistant, highly durable and retains its elasticity.

The vest has been designed so as to prevent unwanted creases and to stay concealed in any position. There is an option to have the CZ 4M VIP vest with an Outlast® inner layer which ensures heat dissipation through a special layer of aluminium nanofibers. At the front, there is a special pocket for an additional ballistic plate to provide protection against rifle ammunition up to Level IV NIJ.

CZ 4M HORNET

Product Code: BV-022

CZ 4M HORNET

BALLISTIC VEST

The CZ 4M HORNET vest has been designed for everyday wear by patrol or security units, civil, security or rescue services and agencies.

It allows both covert and overt use IV NIJ.

The outer material is easy to clean and maintain.

The vest is designed to be multi-size which means that it can be adjusted to fit all common sizes.

As an option, the CZ 4M HORNET vest can be supplied with an internal 3D ventilation insert which is removable and easy to clean.

At the front and back, there are special pockets for an additional ballistic plate with protection against rifle ammunition up to Level IV NIJ.

CZ 4M SPIDER

BALLISTIC VEST

Tactical ballistic vest for police, security and rescue units.

The vest has been designed as a tactical carrier and is made of breathable 2D material with the option to insert a bullet-proof, fragmentation proof and stab proof ballistic insert.

The MOLLE system spans over its entire surface and the vest can be adjusted in the shoulders and at the waist.

There is a strong zip fastener at the front. At the back, there is a strong strap allowing emergency removal of the wearer from a dangerous situation.

CZ 4M STRIKER

Product Code : BV-016

CZ 4M STRIKER PLATE CARRIER

One of the lightest and most durable plate carriers. It weighs only 750g while offering high durability and strength. The shoulder straps are made of Hypalon® material and 25 mm fabric bands. They allow variable attachment of radio headset cables, hydration pack tubes, etc.

The straps are very thin, strong and adjustable in length.

The MOLLE system at the back allows the carrier to be adjusted to suit the body shape. The front plate is interchangeable with the option to use the MOLLE system or the integrated M4 magazine pouches.

3D inner material to improve ventilation and reduce trauma effect after being hit.

The size of the back and front with a patented securing system allows the insertion of ballistic plates in different sizes and shapes.

The sides are formed by strong straps. Due to their design, they will keep even fully loaded pouches in position.

CZ 4M RAPTOR 2.0

Product Code: BV-017

Variant F

CZ 4M RAPTOR 2.0 MODULAR PROTECTION SYSTEM

The RAPTOR 2.0 is a compact modular system designed specifically for special and response units.

The RAPTOR 2.0 meets the requirements for a lightweight and highly mobile plate carrier. Using additional components, it can be modified to a level of protection of a tactical bullet-proof vest. The level of protection can be selected according to the type of the unit, the wearer's function in a team or the current situation.

The CZ 4M RAPTOR 2.0 system can be configured in minutes. The vest is equipped with a quick release system, two types of sides, HCP® system neck protector, shoulder and arm protectors, 3-piece groin protector and a back protector. An MTB® tactical ballistic belt may be added, as well as a set of additional components in protection level III and IV (groin, abdomen and neck protectors). The CZ 4M RAPTOR 2.0 is a unique modular system for the most demanding special combat or security operations.

*Variant B is similar to A, but comes complete with removable side protection.

CZ 4M CORSAC

BALLISTIC VEST

A universal ballistic vest for overt wear. It is suitable for public order patrols and city police units to deal with unexpected crisis and high-risk situations.

Quick and easy adjustment thanks to the unique multi-size design.

There is an interchangeable front plate with the MOLLE system or without it, a neck protector, arm protectors and a groin protector

At the back, there is an emergency strap for evacuating the wearer from a dangerous situation.

The removable ventilation inserts allow quick and easy removal for maintenance and cleaning.

CZ 4M LANCER

Product Code: BV-006

Variant C

CZ 4M LANCER

BALLISTIC VEST

The CZ 4M LANCER represents the most advanced ballistic protection for high-risk operations. This vest offers maximum protection combined with a unique anatomical design which evenly distributes the weight on the wearer's chest and back, thus avoiding excessive load on the shoulders as is common in all rival products of this class. This feature is further enhanced by a patented system of fastening that provides a secure and accurate fit while allowing the wearer to adjust the size as required. In addition, the vest may be tightened with a classic Velcro strap system.

The vest is equipped with a quick release system that ensures the vest falls apart reliably even when in full configuration. The removable 3D ventilation inserts help heat and moisture to escape. The HCP® neck protector allows the use of a helmet or shooting in a prone position. The 3-piece groin protector is suitable for use in a vehicle and does not restrict movement while overcoming obstacles. The CZ 4M LANCER vest is compatible with the MTB® tactical ballistic belt.

BALLISTIC INSERTS

Ballistic inserts are an integral part of a ballistic vest. They accomplish a number of tasks, above all they protect the wearer against pistol ammunition, shrapnel from grenades and explosive devices, while also being used for protection against stabbing and cutting weapons. Together with the fabric carrier, ballistic inserts significantly influence the comfort of wear. The size of the insert and hence the protection area depend on the type of the vest and its use. As a rule, the area covered ranges between 0.3m² in covert vests, up to 0.9m² in tactical vests designed for the most high-risk operations. Ballistic inserts are most often tested in accordance with the NIJ 01.01.04 and 06 standards, however, we can supply inserts tested in accordance with the GOST, CSN TBO, VPAM or HOSDB standards.

BALLISTIC PLATES

Ballistic plates serve as protection against rifle ammunition, including sniper and machine gun ammunition. They are usually inserted into pockets on the front and back of a ballistic vest. To protect the wearer from the side, smaller ballistic side plates are used. Ballistic plates are usually tested in accordance with the US NIJ 0101.04 or the NIJ 0101.06 standard. However, ballistic plates tested according to other international standards, such as HOSDB, GOST, VPAM, TBO and others are also available. Ballistic plates protecting against pistol and submachine gun armour-piercing ammunition may also be supplied on request.

CZ 4M PANTER BALLISTIC SHIELD

The PANTHER ballistic shield with ballistic protection III+ has been designed in cooperation with special police units to offer maximum protection over the user's height.

Thanks to its dimensions, 1000mm by 530mm at its widest point, it is suitable for use in vehicles. Its weight and the design of the handle make the shield easy to use. It is suitable for both left and right handed users. The shape of the shield allows it to be used as a support when using a long firearm.

Product Code: BS-005

CZ 4M POLICE Tactical BALLISTIC SHIELD

The smallest ballistic shield from the family of CZ 4M shields.

Weighing only 1.2 kg, with its compact ergonomic design, the shield is suitable for use in confined spaces, in vehicles or as an emergency shield for frontline police patrols.

Strong padded ergonomic straps form the handles and thanks to the asymmetrical design, they ensure the correct position of the shield when carried.

Meets requirements for protection also against:

9mm+P+, 127 grain Supreme Expansion Technology (SXT)
.357SG, 115 grain Jacketed Hollow Point (JHP)
.357SG, 125 grain Gold Dot Hollow Point (GDHP)

BALLISTIC HELMETS

CZ 4M DELTA

CZ 4M SRS

CZ 4M MICH MID

CZ 4M MICH

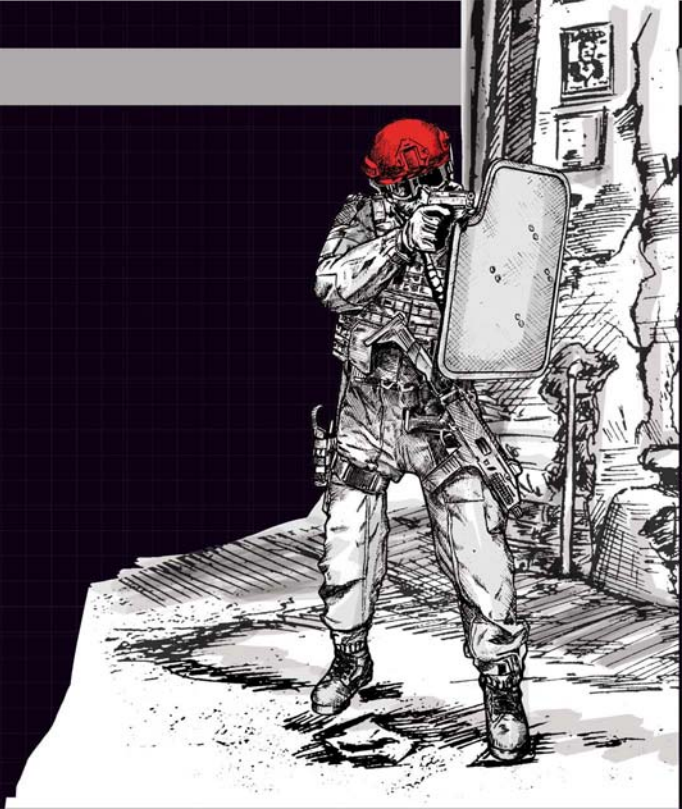

The CZ 4M ballistic helmets are the top choice for combat and security operations. There are several models to meet the various requirements for different types of units and operations. They are fully compatible with communication systems, gas masks and other tactical equipment.

HARNESS SYSTEMS (variants):

OMEGA – four-point harness system with inner mesh. Provides secure and firm grip on the head while providing very good ventilation.

SIGMA – four-point harness system with fastenings on both sides. There is a neck protector at the back and the straps are lighter. On the inside, there are pads with two optional sizes of 19 mm and 26 mm (thickness of pads).

BOA – four-point harness system with fastenings on both sides and an adjustable BOA closure system on the nape. On the inside, there are pads with two optional sizes of 19 mm and 26 mm (thickness of pads).

CZ 4M DELTA BALLISTIC HELMET

Product Code: BH-005

The CZ 4M SPEC OPS helmet has been designed for special units. It is extremely lightweight, with an ultra-low profile of the shell which ensures the widest viewing angle. In addition, it is fully compatible with a wide range of communication devices, glasses and balaclavas.

Allows easy attachment of NVG.

It is compatible with a wide range of gas masks.

The helmet is made of para-aramid material which ensures the helmet is lightweight and durable. The helmet provides protection against handgun ammunition as well as against fragments from grenades and IEDs.

Ballistic protection	Weight	Colour	Helmet sizing	Accessories	Harness systems
Level III-A NU 0106 01 or Level IIIA NU 01_01_06 Fragmentation protection V50 450m/sec - V50 850m/sec STANAG 2920 (17g FGP) US MIL STD 662F	1150 g. CZ 4M SRS PROTECTION HELMET

Product Code: BH-008

The CZ 4M SRS is an ideal helmet for training or operational deployment when it is risky or unnecessary to use a ballistic helmet. This lightweight and extremely durable helmet protects against shock and impact.

Combined with the Team Wendy inner pads and the BOA closure system, it is the ideal solution for specialized army or security units.

It is fully compatible with a wide range of communication devices, glasses and balaclavas.

Mounting of NVG is trouble-free.

It is compatible with a wide range of gas masks.

CZ 4M MICH MID BALLISTIC HELMET

Product Code: BH-002

The CZ 4M MICH MID helmet has the same shell as the MICH helmet, but has a reduced edge to allow the use of a maximum number of various communication devices. The CZ 4M MICH MID is lower in weight, has a lower back part and side edges. There are no protrusions at the front which allows for the easy installation of an NVG. The overall low profile guarantees excellent compatibility with communication devices, including hearing protection and intercom, as well as with a wide range of gas masks.

The helmet is made of para-aramid material which ensures the helmet is lightweight and durable. The helmet provides protection against handgun ammunition as well as against fragments from grenades and IEDs.

Ballistic protection

The MICH helmet is available in protection level NIJ IIA.

Fragmentation protection

V50 700 m/s according to STANAG 2920 (17gr FSP) and US MIL STD 882F. Meets and exceeds the UAS ACH MIL SPEC V50 for 2,4, 16,64 17gr fragment.

Colour

Standard colours are Black, Navy, Blue and Olive. Other colours are available on request, including IRR coating.

CZ 4M MICH BALLISTIC HELMET

Product Code : BH-001

The CZ 4M MICH helmet is lightweight with a reduced profile across the entire circumference. The low profile ensures excellent compatibility with communication systems, gas masks and NVG. The helmet is made of para-aramid material and provides robust ballistic protection against ballistic ammunition and fragments. The straps of the four-point harness are fixed to the helmet by ballistic bolts.

The harness system along with the padding ensures ideal position and stability.

Ballistic protection

The MICH helmet is available in protection level NIJ IIA.

BACKPACKS

CZ 4M FOP 35

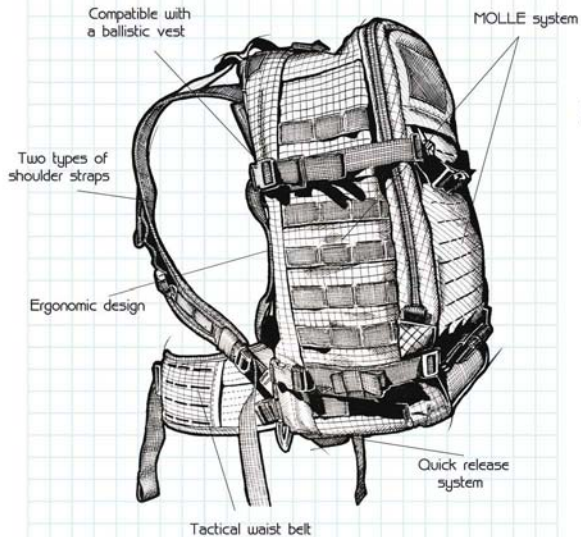

CZ 4M EXPEDITION 60

The CZ 4M tactical backpacks are based on long-term experience of experts of the brand and on regular consultations with the current end users from the ranks of army and police special units.

Their design reflects our effort to raise something as common as a simple backpack to a functional part of a whole tactical equipment system. Therefore, the CZ 4M backpacks are highly modular and allow the interchangeability of, for example, carrier systems. This means they can be customized for a specific operation and task.

CZ 4M FOP 35

Product code : BA-001

CZ 4M FOP 35

The CZ 4M FOP 35 combat backpack has been designed for a wide range of operations. It can be used as an escape backpack, a backpack for short patrols and with the addition of interior accessories also as a specialist backpack. There are two compartments, a smaller one at the front and a larger one at the back. The shoulder straps and waist belt are adjustable. The shoulder straps can also be replaced with special ones designed for use with a ballistic vest. What is more, the carrying system of the 60I backpack may be used when the load exceeds 15 kg.

Additional outer pockets can be attached to the backpack to increase its volume to 60I. In an emergency, the quick release system allows the user to drop the actual pack with the shoulder straps, while the waist belt remains attached to the user. The front pocket can be supplied with a concealed PDW holster (e.g. CZ Scorpion EVO).

Weight

2,0kg

Material

Cordura 500, Nylon F-TEX

Product Code: BA-002

CZ 4M EXPEDITION 60

The CZ 4M 60 patrol backpack has been designed for prolonged patrols and for carrying the complete equipment of the individual.

The compartments may be accessed through the top opening or after unfastening the upper or lower lid on the front of the backpack. Such access allows the contents to be reached fast and organized perfectly. The shoulder straps and waist belt are adjustable. The shoulder straps can also be replaced with special ones designed for use with a ballistic vest.

Additional outer pockets can be attached to the backpack to increase its volume to 85l. In an emergency, the quick release system allows the user to drop the actual pack with the shoulder straps. The waist belt remains attached to the user.

CZ 4M OPERATOR + COMBAT SOCKS

CZ 4M PATROL + DUTY SOCKS

The CZ 4M combat and response uniforms have been designed to be fully compatible with ballistic protection, backpacks and other tactical equipment. This means that pockets are accessible even when wearing a ballistic vest, inside a vehicle or in the prone position. We do not use inserts made of elastic materials as their protective function is very low. We prefer concentrating on the perfect design of all parts of the uniform so that they do not restrict movement. The CZ 4M clothing includes underwear and accessories.

- Contains MOIRA fiber

- Summer

- Moisture control

- Soft step comfort

- Winter

CZ 4M OMEGA TROUSERS

Product Code: UN-001

CZ 4M OMEGA TROUSERS

The CZ 4M tactical trousers have been designed for a wide range of special military and security operations.

They are made of tear-resistant material which is also highly breathable. The special anatomical design offers perfect freedom of movement without the need for elastic fabric as is common in rival products. All available knee protector inserts may be used, including D3O® or Crye Precision® protectors.

The pockets for knee protectors are adjustable in height. The thigh cargo pockets have removable magazine pouches for assault rifles, PDWs or pistols, and an internal organizer. They are accessible from above and from the side. The front thigh cargo pockets are accessible while wearing gloves and in a vehicle while sitting down. The insides of the lower legs are protected by F-TEX® inserts with nanocarbon coating, which is extremely durable as well as silent.

CZ 4M OMEGA JACKET

Product Code: UN-002

CZ 4M OMEGA JACKET

The CZ 4M tactical jacket has been designed for use in all types of special military or security operations.

It is made of tear-resistant material which is also highly breathable. The special anatomical design of the sleeves and the back allow great freedom of movement without the need for elasticated parts, as is common in rival products.

All available types of elbow protectors may be inserted in the sleeves. Under the arms there are ventilation holes with a zip. The sleeve pockets can be accessed from the top and the side. The front chest pockets are accessible even when using a ballistic vest. In addition, the zipper pulls are placed so that they are away from the space under the ballistic vest to avoid secondary injuries when hit in the zipper.

On both sides, there are slits with zips to enable easy access to the service pistol on the belt. The lower pocket on the back may be used to hold a raincoat, etc.

CZ 4M POLO SHIRT

A polo shirt for CP operations and paramilitary activities.

The polo shirt is made of MOIRA KOMFORT fabric which alternates warm and cold zones in exactly defined strips. On the skin, the material feels thermally stable and has a slightly airy effect.

The polo shirt has been designed for everyday wear in various climatic conditions. The hot and cold zone system is patent protected.

On the sleeve, there is a pocket for small items and a velcro pad for the attachment of ID.

CZ 4M SUMMER UNDERWEAR SET

The CZ 4M MOIRA underwear set has been developed by MOIRA for the tactical range of CZ 4M clothing.

The summer set consists of a short sleeve t-shirt and boxer shorts (men's or women's).

Thermal comfort is provided by the specially developed MOIRA DEFENDER COMPACT material and the special design of the underwear. Panels in crucial areas help moisture to evaporate faster and the elastomer regulates the fit on the body, from a fairly loose feel to a compressed feel in certain parts. The Moira microfiber used on both sides guarantees thermal stability.

Material weight	Material	Colour	Size
130g/m ²	MOIRA® X-Compact, Ultralight	Green	S-M, L-XL

Product Code: UN-018
UN-019

CZ 4M WINTER UNDERWEAR SET LEVEL I

The CZ 4M MOIRA Level I underwear set has been developed by MOIRA for the CZ 4M tactical line of clothing.

The winter set consists of a long sleeve t-shirt with a thumb-hole and long pants (men's and women's).

Thermal comfort is guaranteed by the MOIRA Therman material which draws body moisture away from the skin to the outside. The brushed surface of the material acts as an insulant by holding a large amount of air.

Therman has been designed to provide the first layer of clothing in cold environments. When used in low temperatures, it is advisable to wear the Level II set as a second layer, which will significantly increase the user's thermal comfort even when the outside temperature reaches -40°C .

UN-014

CZ 4M WINTER UNDERWEAR SET LEVEL II

The CZ 4M MOIRA Level II underwear set has been developed by MOIRA for the CZ 4M tactical range of clothing as a layer of performance clothing for extreme conditions.

The Level II winter set consists of a long sleeve t-shirt and long pants. Thermal comfort is provided by the warmest MOIRA material, the MOIRA Trio. As with velour, TI 920 polypropylene loops are closest to the skin and the next layer is made up of Moira TG 900 wicking yarn. The last and thinnest layer can capture and dissipate a surprising amount of moisture.

The different properties of the fibres and their varying percentage in the overall construction of the fabric ensure fast wicking of moisture from the skin and thus perfect thermal insulation. The TRIO will retain heat even at lower physical activity while staying breathable.

By layering the Level I underwear set and Level II winter set, thermal comfort will be greatly increased even when the outside temperature falls to -40°C . There is also a sleeve pocket and velcro pads for the attachment of an name tag and rank badge.

CZ 4M HEADOVER

A versatile headover made of double layer Merino Moira knit.

The Moira fibres have excellent wicking properties, drawing moisture away from the body into the outer woollen layer. This layer is made up of extremely fine Merino Super Fine 16 μ m fibres that absorb moisture coming from the inside, thereby providing perfect thermal insulation.

The inner layer made of polypropylene microfiber feels very pleasant on the skin, this item of clothing may therefore be worn also by people who are sensitive to 100% wool products. The wool is treated with Superwash technology to avoid felting.

Product Code: UN-012

CZ 4M SUMMER HAT

The summer hat has been designed for everyday use as a base layer to be worn under a helmet or for sport activities.

Regarding construction, a new type of knit has been used, namely the Ultralight New. It is used in products where fast wicking is required during varying physical exertion.

The Ultralight New is the second generation of successful material with an improved weave. The knit is made of fine polypropylene silk, making it much nicer to touch than previous generations. The weave is very airy, which is a decisive factor in maintaining the thermal balance of the body.

CZ 4M WINTER HAT

The winter hat is made of the Trio material, which is one of the warmest MOIRA materials.

The different fibre properties and their ratio in the overall weave of this three layer knit fabric provide perfect thermal insulation and guarantee rapid wicking.

Closest to the skin are velour loops made of polypropylene silk. The middle is the wicking layer and the third layer made of MOIRA yarn can dissipate large amounts of the absorbed moisture. The loops retain a sufficient amount of heated air, thus increasing the thermal protection of the body. The TRIO retains heat even during limited physical activity while staying breathable.

CZ 4M COMBAT SOCKS

The CZ 4M COMBAT durable winter socks are made of wool and synthetic materials.

Thanks to the high natural wool content, the socks are comfortable even when wet. Excessive moisture is wicked by polypropylene fibres to the outside and the foot feels dry heat.

The reinforced toe extends across the sole over the heel and all the way to the hem, thus protecting the Achilles tendons and ankles. The elasticated band helps to provide support. The tall double hem protects the shin in high combat boots

Material

Wool 55%, acrylic 10%,
polypropylene 30%, elastan 5%.

CZ 4M OPERATOR SOCKS SOCKS AND LINERS

The CZ 4M OPERATOR socks offer a unique solution for extremely challenging conditions.

The loops of the strong weave soften the impact on the foot and retain a large amount of air that acts as an insulator. The socks also feature a reinforced toe and heel, there is also a reinforced area protecting the Achilles tendon. The OPERATOR socks come with lightweight liners as a set. The wearer can therefore choose from three options: to wear the socks alone, with liners or the liners alone.

When worn with the liners, they should be pulled on with the smooth side inward. The outer plastic segments snap into the inner structure of the sock, thereby preventing the sock sliding. Moisture enters the smooth knitted layer of the liner and is drawn to the outside of the sock. The woollen toe of the liner generates heat when wet. The space between the sock and the liner retains a large amount of air, thus providing excellent thermal balance.

When wearing the liners alone, it is necessary to pull them on with the plastic segments facing inwards, towards the foot. The wool on the toe generates heat when wet and the channels between the plastic segments draw the moisture to the outside. The result of both options of the liners is a superb feeling of dryness and warmth in all climatic conditions.

CZ 4M PATROL SOCKS

The CZ 4M PATROL year round socks have been designed for prolonged comfortable wear even in hot climates.

The inner layer of the PATROL socks has loops that draw moisture away while maintaining good thermal balance, preventing pressure marks and defining the foot in the boot.

Both the toe and heel are reinforced. In addition, there are reinforced elastic side panels running from the toe all the way to the hem. The instep is made of airy elastic knit that allows good ventilation of moisture. There is an elastic band running across the instep, foot and above the ankle to prevent the sock sliding in the boot.

TACTICAL ACCESSORIES

CZ 4M MTB BELT

CZ 4M SLINGS

CZ 4M HOLSTERS, POUCHES AND ACCESSORIES

The CZ 4M holsters, pouches and tactical accessories have been designed with great care to emphasise functionality and reliability.

Very important is also their compatibility with various types of weapons, vests and other personal equipment.

Before being introduced on the market, all products are subjected to testing and evaluations regarding their resistance and functionality.

Product Code: BT-003

CZ 4M MTB BELT

This modular tactical belt has been designed as an accessory to carry items of personal equipment and arms. It also serves as additional protection for the lower parts of the user's body thanks to the removable ballistic parts.

The belt is composed of several parts, each of which provides a different function.

These individual parts and functions can be combined in accordance with the user's needs:

- Inner belt – to be worn through the trouser loops
- Connecting segments – connect the inner and outer belts
- Shooting belt – with MOLLE system and segments
- Rescue belt – with COBRA buckle and strong eyelet
- Ballistic belt – ballistic insert
- Carry straps – for a fully equipped belt

Material	Weight	Colour	Size
Cordura 500 - 1000	with ballistic accessories - 1.068 g	Black FDE Multicam Vzor 95 Forest	S-M L-XL XXL-XXXL

CZ 4M WEAPON SLINGS

The CZ 4M weapon slings have been designed with great care and emphasis on functionality and reliability.

They are compatible with various types of weapons. The one-point CZ 4M sling series is suitable for PDWs, such as the CZ Scorpion EVO or the HK MP5 weapons.

The multipurpose 1-2 point slings have been designed for assault rifles. They can be used as classic slings with front and rear swivels or as a tactical 1-point sling.

The choice of materials is important, particularly the actual straps and carabiners that ensure comfortable wear while protecting the weapon parts. In the more advanced series of slings, drop and stress tests are standard.

CZ 4M HOLSTERS, POUCHES AND ACCESSORIES

All handgun holsters, magazine pouches, radio station holders and other personal equipment have been designed with great attention to detail.

Functionality in any situation and maximum durability are features that are characteristic for all CZ 4M holsters and pouches.

The CZ 4M holsters and pouches are fully compatible not only with products of the same brand but also with a wide range of tactical or ballistic vests with a standard MOLLE system. Prior to production, the holsters and pouches are tested over a long period of time by both the manufacturer as well as police and army units. Thus when the products come on the market, they guarantee correct function and long-term durability in any environment.

Equipment for professionals

The design of the emergency medical clothing and equipment has been based on experience from the use of CZ 4M tactical products.

Professional services require the same thermal and mobility comfort as well as offering maximum protection. The design of the clothing, vests and other equipment has been modified to meet the requirements of rescuers and paramedics.

High emphasis has been placed on the choice of modern performance materials that are lightweight and provide thermal comfort, protection against water, fire and other risks faced by medical rescue teams.

Equipment for professionals

The CZ 4M brand is not just a combat equipment brand but it also offers high quality professional clothing and equipment.

Police units, city police officers and private security services will appreciate the careful selection of materials that provide thermal comfort as well as protection against fire or water. All components have been designed in compliance with the demanding requirements for the comfort of wear during prolonged engagement.
